Steps to run the FIO tool on Linux Environment:

install fio using "sudo apt install fio"

steps to RUN:

download the fio_test.sh and add
add all the .fio files in the directory where .sh file is downloaded.

CHANGE the file mode in terminal by : chmod +x fio_test.sh

RUN the .sh file using : fio_test.sh > output_fio.txt

the output of the fio tool will be stored in output_fio.txt
